This map's Tokai torrential rain record shows the flooded areas based on the issuance history of the "Proof of Disaster" issued for the building flooded by heavy rains in the Tokai region on September 11 – 12, 2000. For this reason, even places that were not actually flooded may be displayed as flooded areas.
If further details need to be confirmed, contact the Obu City Hall Crisis Management Division.
For actual heavy rains, pay attention to the way rain falls and flooding status, and evacuate immediately as soon as danger is felt.
To prepare for emergencies, write down the route from your home up to the evacuation center, your family's contact details, etc., on the disaster prevention map and confirm with everyone.
