

Resource and Garbage Separation App Distribution will begin in September 2023!

さんあ〜る[®]

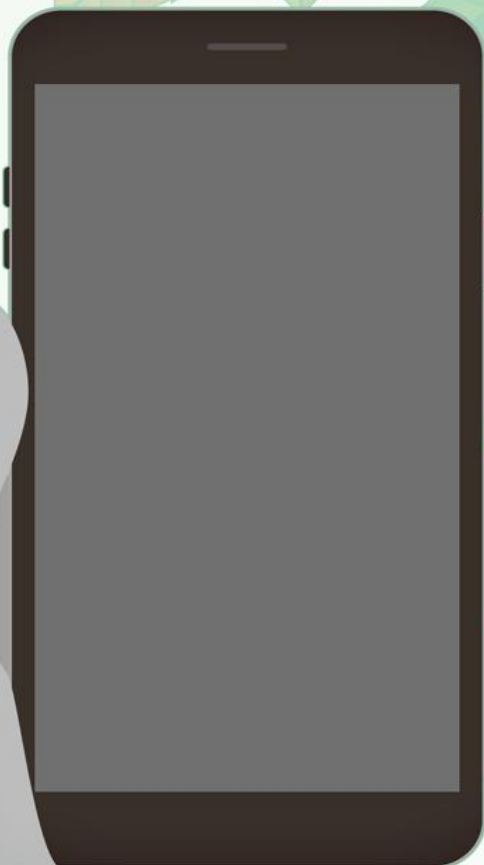

for iPhone
for Android

Have you ever wondered how to separate resources and garbage and on which collection day?

"San-aru", an application for sorting resources and garbage, allows you to easily search for sorting methods and to be notified of collection dates,

It is an application with a function to easily search for sorting methods and inform you of the collection date of resources and garbage.

There are also quizzes to make learning fun. We hope you will use it.

Discrimination Search

- You can search for sorting methods by the name of resource and garbage items.

Resource and Garbage Separation Guide

- Find out how to separate and serve in detail and what to look out for.

Calendar of Collection Days

- By setting your region, you can see the collection dates in a calendar format.
- There is an alarm to remind you of the collection date.

Notification functions

- You can check information on resources and garbage.
